More satisfied clientele at less than 30% cost?

MESSAGE

Discover an Easy, Effective and Economical way of making your kitchen more effective and highly productive.

A highly efficient kitchen providing excellent service and with satisfied clientele is what every restaurant owner wants.

But it's not easy trying to keep your costs down with a very busy restaurant going at the same time.

Creating more space in the kitchen will help your kitchen run more efficiently, but how can you create such space with big coolers which are difficult to move and expensive to replace?

Well, our CHILL-O-MATIC LBR COOLERS will help solve these issues and more. First of all, these LBR coolers are light and on rollers, so you can move them to a new section of your kitchen in minutes.

Plus the cooler is just as energy efficient as models from our competitors. It also weighs less because of its lighter compressor.

Thereby, creating that much-needed space for making more dishes and providing a quick and efficient service.

At less than 30% cost of other comparable coolers

And it is 28.2% less expensive when compared to other models in the market from a comparison study commissioned by LR brown and associates.

We'll be showcasing this highly economical and convenient Chill-o-Matic cooler at the Upcoming Restaurateur Conference & Trade Show.

And we hope you'll be there as we are offering a **25% discount coupon good for six months** giving a saving up to \$1000 should you decide to acquire the cooler.

But there are **only 50 discount coupons** available.

So to make sure you don't miss out on this opportunity, **click here** to register for your coupon. You can then pick it up with your name on it at the show.

I hope you don't miss on this savings.

Looking forward to seeing you at our booth at the show

Kind regards
